Pre market open tweet: [Follow WWR on Twitter](#)

S&P closed yesterday near the .382 retracement level of the 5 wave decline from the 1/18 high on a 1 minute chart at 2636 (2638) Upside resistance for any moves higher from current levels: $.500 = 2644$ $.618 = 2651$ Longer term downside targets remain unchanged. [#woodsonwave](#)

Shortly afterwards:

[WoodsonWaveReport](#) @16181382

First target of 2644 achieved!

The S&P moved slightly about the ideal Fibonacci .500 retracement level of 2644 to 2647 (where wave c up was equal to wave a from the previous day's low) before reversing course lower.

Fibonacci Options Day Trader Report

Again, we traded in and out of at the money puts and made a net realized gain of \$1,510.17.

We bought two Jan 25th 2650 puts at 14.90
We sold them at 19.20 and 20.10.

We then waited for the market to register an overbought condition and bought two Jan 25th 2625 puts, trading at the money at 14.20. We sold them at 16.30 and 19.40.

We bought two more Jan 25th 2650 puts at 19.40 as the retracement reached the .382 retracement level and the stochastic (5 minute, 5 day) was overbought. The S&P remained overbought got over an hour and we bought one more Jan 25th 2650 put at 18.80 as the market reached a Fibonacci .500 retracement, and yet one more (at 16.20) as the market stayed overbought for over an hour from 2 pm Eastern to 3:15 Eastern.

The market closed up at 4 pm but the futures traded down about 6 points (options that don't expire that day trade until 4:15 pm)

and our 2650 put that was valued at 13 at the close was now over 18. So we sold the one we bought at 16.20 at 18.30 and carried the other three into tomorrow.
