At or Near a Turning Point

As the chart above illustrates, our Fibonacci turn date spiral has called most of the recent turning points since the all-time high in the S&P on 9/21/18. The Fibonacci 144 day turn date points to now. Some of the previous dates have seen a “slippage” of as many as 2-4 trading days, so we might allow for a couple more days of highs. The market is overbought at multiple levels and we believe a turning point is at hand.

Yesterday we actually bought a couple of calls anticipating one last move to the upside. We sold them for a net loss of \$53.91. Yes, we’ve been trading very cautiously as the volatility has decreased. We think that is about to change very soon. In anticipation of the coming decline we bought two Feb 22nd 2750 puts at 19.20. They closed today at 20.60.
