2018 Performance Report

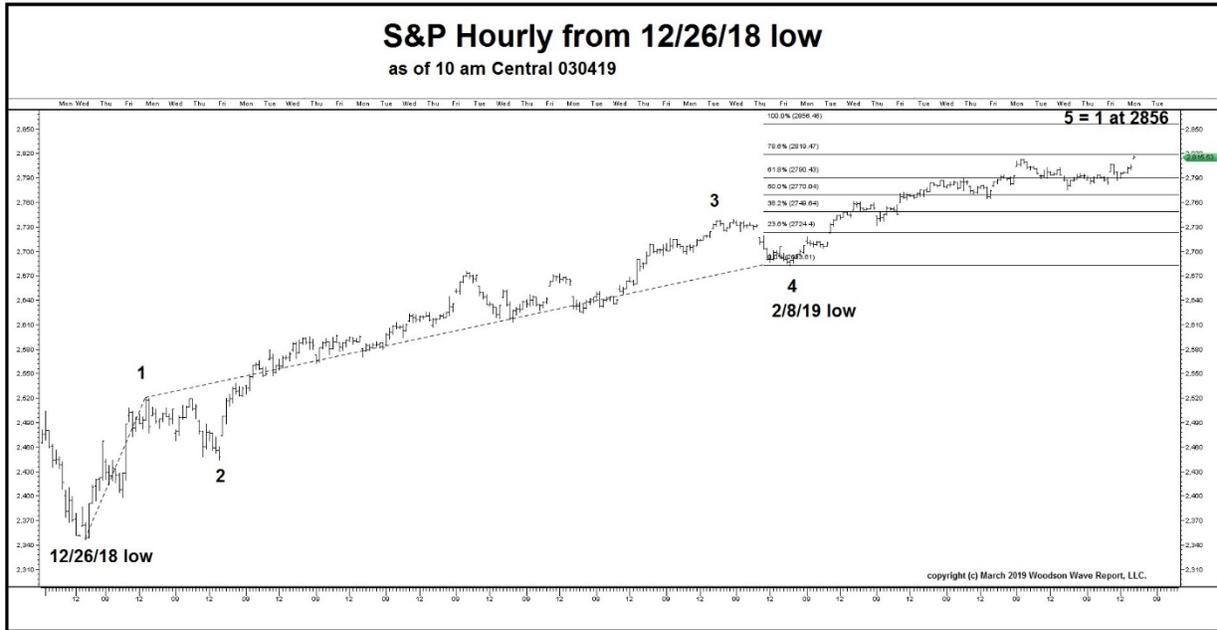

Account #1 + 29.59%

Account #2 + 69.04%

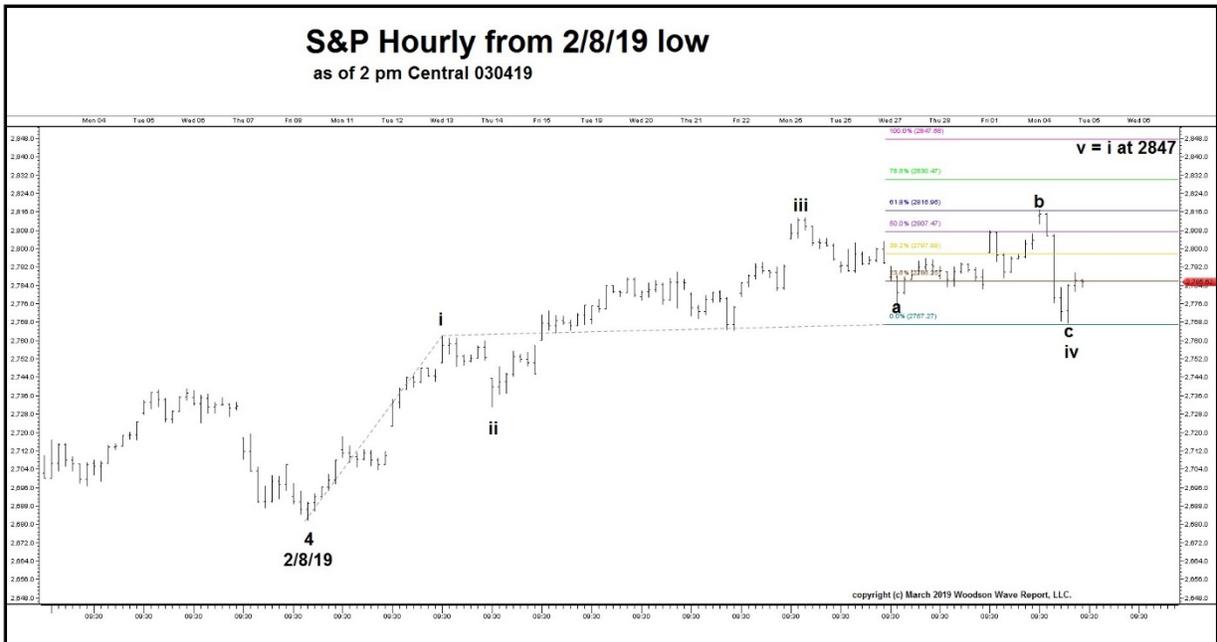

Account #3 + 133.47%

S&P 500 – 6.24%

Wave 5 up = wave 1 from the 12/26/18 low at 2856.

Wave v up = wave i up from 02/08/19 low at 2847.

Note: Wave b in the chart above could be counted as an ending diagonal triangle and the top of wave v at today's 2816 high. A break below the wave i high of 2761 will confirm this count.

Sometimes, the best trade you make is no trade. It's also a good idea to have all personal matters settled before trading. My 18 year old nephew died unexpectedly in a fire in Mexico last week. I am the point of contact between the US Embassy in Mexico and my family trying to get his body back to the USA. Since the death was a violent death and not one of natural causes, the coroner cannot release the body until the investigation is complete. This process still may take a week or more. I took a few days off from trading last week, but even though this process is still not complete, I jumped in and bought a couple of calls after the market started falling this morning, looking for that last fifth wave up to 2847 - 2856. Joking to my wife this weekend about how the market never goes straight up or straight down I told her "I know how to get the market to go down, I'll buy some calls!" Of course, I've now become my own contrary indicator!

Today we bought two March 4th 2800 calls in one account at 6.00 and two in the other account at 7.80 which were in the money at the time of purchase, but fell to worthless by the close today.

Use the wave i low of 2761 in the S&P as a barometer. Any move below that indicates that the fifth wave up is likely complete and there is more bearish potential below. Resume a short position with any move below 2761.

The S&P did manage to close the open gaps at 2792 and 2774 today. The next open gap is at 2745 (see chart page 2 of the 022519 report).

Positions for rating services:

Long-term counts are found on weekly and/or monthly charts and generally cover a time period of years to decades.

Intermediate-term counts are found on daily and/or weekly charts and generally cover a time period of weeks to years.

Short-term counts are found on daily and/or hourly charts and generally cover a time period of days to hours.

Dow:

Long term: Remain short.

Intermediate term: Remain long against the 2/8/19 low.

Short Term: Remain long against the 2/8/19 low.
