2018 Performance Report

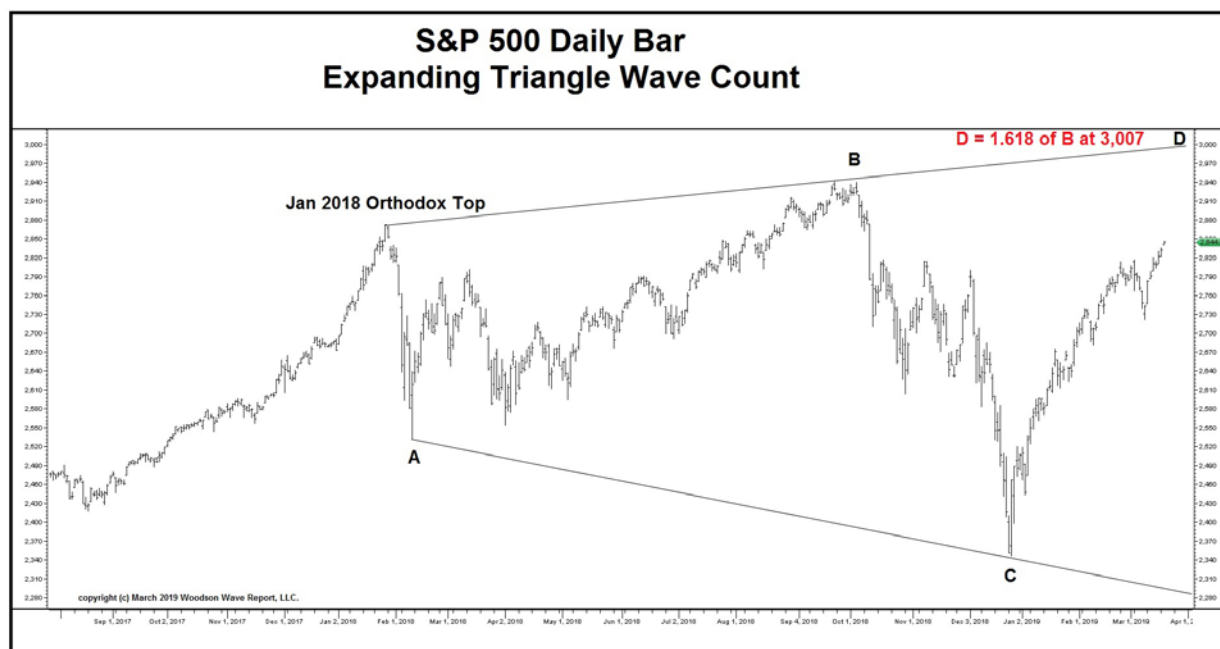

Account #1 + 29.59%

Account #2 + 69.04%

Account #3 + 133.47%

S&P 500 – 6.24%

S&P 3,007 by March 25, 2019

Since resistance at 2800 did not hold, we expect the S&P to continue higher in wave D in the expanding triangle wave count pattern up to new all-time highs much like it did once it significantly broke above 2800 in wave B to new all-time highs (see chart page 2, WWR 031319).

WWR moves to long position in the short and intermediate term until March 25, 2019 or S&P 3000, whichever comes first.

Wave Personality - Wave D:

From *Elliott Wave Principle* by Frost and Prechter:

“D waves, being advances within corrective waves, are as phony as B waves.”

If any advance seemed “phony” this one surely qualifies. We expect this D wave to move to new all-time highs. Regarding price it should top at or near the 3,000 level, gaining a perfect Fibonacci 1.618 multiple of wave B at 3,007. In regards to time, of course our Fibonacci turn date of March 25, 2019 should mark the top of this move up from the 12/26/18 low (see chart page 3 of yesterday’s report).

The main reason this wave count is the preferred count is our long term chart from the 2009 low. Recall that this wave count gained Fibonacci perfection at the January 26, 2018 high. At that level, (2872) wave five gained perfect equality to wave one from the March 2009 low. Below is a reprint of the S&P weekly chart from the 12118 issue of WWR.

- Wave (2) was a perfect .382 correction of wave (1).
- Wave (4) was a perfect .382 correction of wave (3).
- Wave (3) was a perfect 1.618 multiple of wave (1).
- Wave (5) was a perfect 1.00 equality with wave (1).

From the January 26, 2018 high (see chart page 2):

- Wave C down was almost a perfect 1.618 multiple of wave A.
- Wave D up will be a perfect 1.618 multiple of wave B at 3,007.
- Wave D up will last a perfect Fibonacci 89 days on March 25, 2019.

Fibonacci Options Day Trader Report:

Bought two March 25th 2850 calls at 11.10 this morning.

Positions for rating services:

Long-term counts are found on weekly and/or monthly charts and generally cover a time period of years to decades.

Intermediate-term counts are found on daily and/or weekly charts and generally cover a time period of weeks to years.

Short-term counts are found on daily and/or hourly charts and generally cover a time period of days to hours.

Dow:

Long term: Remain short.

Intermediate term: Move to a long position until March 25, 2019 or S&P 3,000 whichever comes first.

Short Term: Move to a long position until March 25, 2019 or S&P 3,000 whichever comes first.

NASDAQ:

Long term: Remain short.

Intermediate term: Move to a long position until March 25, 2019 or S&P 3,000 whichever comes first.

Short Term: Move to a long position until March 25, 2019 or S&P 3,000 whichever comes first.

S&P 500:

Long term: Remain short.

Intermediate term: Move to a long position until March 25, 2019 or S&P 3,000 whichever comes first.

Short Term: Move to a long position until March 25, 2019 or S&P 3,000 whichever comes first.

Gold: Remain short against the wave 4 high of \$1365.68.

Bonds: *Remain long.*
